

**IT MAY NOT BE LONG  
BEFORE YOUR HYDRO BILL  
IS THREE OR MORE TIMES  
WHAT IT IS NOW.**

- In Vancouver in 2006, an energy consumption rate of 1000 MWh/month was billed at a cost of \$97.00, about \$10.00/MWh.
- In San Francisco in the same year, the same energy consumption was billed at \$320.00/month. In Boston, it was \$361.00.
- The reason our hydro has been so inexpensive is that we have owned the generating assets.
- Without public consultation, the BC government has changed that.
- Although BC Hydro is still public on the surface, the energy system is being privatized, and BC Hydro transformed into a purchaser of power from private suppliers.

For more information and to find out what you can do, visit [www.burnabycoalition.com](http://www.burnabycoalition.com).

You will find:

- a 12-point summary of the issue
- a petition
- a Virtual view of power projects on google earth

and more.
